

Looker Integration

Did you know that Looker integration can be set up in minutes and will save hundreds of hours in data preparation and LookML creation time?

SOLUTION OVERVIEW

Promethium's AI driven automated data management with Looker's powerful analytics combine to enable analytics in minutes instead of months.

KEY BENEFITS

Answer Business Questions Faster

Remove everything that slows down answering business questions, like waiting for long ETL jobs, complex migrations, LookML generation and more. Easy **one-click** integration.

Save Time

With AI driven automation Promethium can reduce the time spent on data discovery, preparation, query and LookML generation **from months to minutes**.

Enable Self Service Analytics

Promethium delivers features to Looker users that enable self service analytics, like intuitive search for finding published Looker reports and dashboards.

Unlock Insight Across Multiple Sources

Get insight without the normal challenges of joining data from different sources. Instantly join tables from different data sources and give Looker users access to **more data instantly**.

Expand Looker Use

Remove complexities and create a **better user experience**. When users don't need to learn LookML and don't have long data wait times it is easier for everyone to use Looker to get insights.

Boost Collaboration, Reduce Duplication

Enable Looker users and Data Teams to collaborate on answering business questions with data, then share the answers as easy to find Looker reports.
